SQuAT-Vis: Visualization and Interaction in Software Architecture Optimization*

11th Symposium on Software Performance
2020 (SSP 2020) – Extended Abstract

Sebastian Frank,
André van Hoorn

Software Architecture Optimization (SAO) - Context & Use Cases

Based on:

A. Aleti et al. "Software architecture optimization methods: A systematic literature review". In: TSE 39.5 (2013), pp. 658–683.

Investigating SAO Results is difficult

Plots / (Generic) Visualization Tools

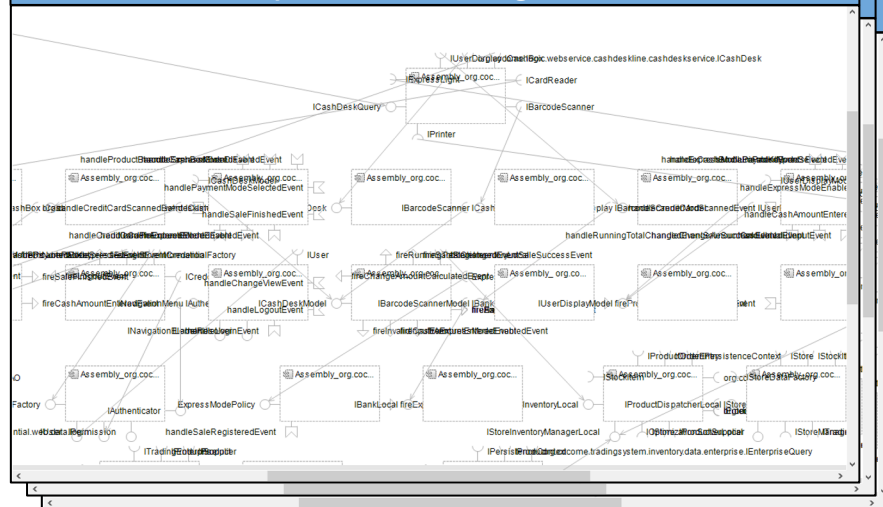

Responses

Architecture

Graphical Modeling Editors

Goal

Investigate suitable visualization and interaction techniques to **support architects in (interactive) SAO** and **develop a tool** implementing these techniques.

Research Method and Process

- 4 Use Cases
- SAO Approaches

- Prototyping
- 3 Views

- GlassFish Server
- Javascript + D3.js

- Expert User Study
- Scalability Study
